

HERMAN BASSON

Senior Software Engineer | Full-Stack Development & Project Leadership

Cape Town, South Africa | +27 82 947 7162 | herman-b@live.com | linkedin.com/in/herman-basson

PROFESSIONAL SUMMARY

Senior Software Engineer with over eight years of full-stack development experience across commercial, telecommunications, gaming, and enterprise sectors. Proven track record leading projects from inception through deployment, mentoring team members, and driving stakeholder alignment in Agile environments. Actively expanding into AI-assisted and agentic development, working with tools such as GitHub Copilot, Kiro/KiroCrew and other developments to build agents and skills. Currently pursuing an MCom in Information Systems at the University of Cape Town, researching AI governance and software engineering practice adaptation, having completed a BCom Honours in Information Systems Management (Cybersecurity). Known for a proactive, self-driven approach to learning and a strong commitment to knowledge-sharing across teams.

CORE SKILLS

Full-Stack Development: Front-end & back-end development, microservices architecture, API design

AI & Agentic Development: GitHub Copilot, Kiro, KiroCrew, agent and skill creation, agentic development workflows

Languages: .NET, C#, Java, PHP, TypeScript, JavaScript

Web Technologies: HTML, CSS, React, Node.js, jQuery, Angular

Databases: SQL (MS SQL, Oracle, MySQL), NoSQL (DynamoDB)

Cloud & DevOps: Azure/Entra, AWS fundamentals, CI/CD, Docker, Jenkins, GitHub Actions

Version Control: GitHub, Bitbucket, SVN, GitFlow

Methodologies: Agile, Kanban, project leadership, code review

Operating Systems: Microsoft Windows, Linux, Unix

PROFESSIONAL EXPERIENCE

Senior Software Engineer — Rank Interactive, Cape Town

Sep 2022 – Present

- Direct front- and back-end development using Java, C# .NET, React, Material UI, and Tailwind for web/API development and microservices, including ongoing feature development and support for legacy ASP.NET systems.
- Lead projects from inception to deployment, providing system support, hypercare, and production incident response to ensure smooth Agile delivery using Jira and Slack.
- Drive and align iGaming integrations into the digital business, working closely with external providers on gaming transactions and game-management services consumed by front-end applications, while leading key areas of feature enhancement and incident management.
- Design and build AI agents, agentic workflows, and AI-driven integrations for the organisation, including technical investigations and proof-of-concepts (POCs) using tools such as GitHub Copilot and Kiro/KiroCrew.
- Mentor and collaborate closely with team members through code reviews, pairing, and project delegation, progressing into a leadership role while engaging stakeholders on development strategy and planning.
- Contribute to architectural decisions and new feature development that improve system scalability, performance, and maintainability, translating technical improvements into measurable business value.
- Drive inter-team collaboration spanning planning, code sharing, investigations, and cross-system initiatives.
- Work across a broad tech stack — C#, ASP.NET, .NET, HTML, CSS, JavaScript, jQuery, TypeScript, MS SQL, NoSQL, Jenkins, Docker, and GitHub Actions — and utilise AWS Console/CLI for serverless architectures including DynamoDB; manage version control with Bitbucket and GitHub.

Software Engineer — Metrofibre Networkx, Centurion

Sep 2020 – Aug 2022

- Developed front- and back-end features using C# .NET, with a focus on microservices architecture.

- Managed production Web/API deployments and engaged directly with stakeholders and clients.
- Provided system support and conducted code reviews within a DevOps and Agile environment.
- Built websites, portals, and internal systems using C#, HTML, CSS, SASS, Razor, JavaScript, jQuery, TypeScript, REST APIs, Event Stores, and MS SQL.
- Managed version control with GitHub and GitFlow.

Software Developer — Face Technologies, Centurion

Nov 2019 – Aug 2020

- Engaged in front- and back-end development using Java, with additional front-end work in C# .NET and Angular.
- Applied a diverse technology stack including C#, Angular, Java, HTML, CSS, JavaScript, jQuery, TypeScript, and MySQL.
- Managed code with SVN in an Agile environment, ensuring efficient project workflows and delivery.

Software Developer — Blue Label Telecoms, Sandton

Oct 2018 – Oct 2019

- Developed and maintained front- and back-end features using PHP within a Linux-based production environment.
- Built and maintained key systems including the main Ticketing Website, Access Control System, Sugar CRM, and User Portal.
- Introduced new technologies to the system through development in Angular and Node.js.
- Worked across a comprehensive tech stack: LAMP, JavaScript, jQuery, HTML, CSS, TypeScript, YAML, Bootstrap, Docker, SSH, MySQL, and T-SQL.
- Managed version control using Git and Bitbucket, and automated deployments with Ansible scripting.

Software Developer — Face Technologies, Centurion

May 2017 – Sep 2018

- Developed and maintained front- and back-end systems using C# .NET MVC and Java, including Hibernate, EJB, and ZK.
- Contributed to key projects including Senegal's vehicle and licensing system and Uganda's Ministry of Public Service.
- Utilised a diverse tech stack including C#, Java, HTML, CSS, JavaScript, jQuery, and databases such as MS SQL, Oracle, and MySQL.
- Managed version control using SVN.

EDUCATION

MCom in Information Systems (in progress)

University of Cape Town | 2026 – Present

Research focus: AI governance and software engineering practice adaptation.

BCom Honours, Information Systems Management (Cybersecurity)

University of Cape Town | 2024 – 2025

Specialised in cybersecurity management within information systems.

BSc in Computer Science

North-West University, Potchefstroom | 2013 – 2016

Bachelor of Science degree in Computer Science.

Certificate in Comprehensive Programming

CTI Education Group | 2012

Fundamentals of programming and algorithms; design and implementation of relational database schemas.
